Tulip-Medical b.v.

HEALTHCARE SUPPLIERS

Edition 4, May 2015

12½ year anniversary

Tulip-Medical is celebrating its 12½ year anniversary. And of course we hope to add many more. We would like to take the opportunity to say thank you for your support and cooperation in these years. We appreciate your loyalty and the very pleasant way of communicating. We have sent you a basket of tulip bulbs, we hope you can place it in your office. You will find an IFU in the box that will give you directions, and please do send us a photograph when you succeeded in breeding tulips.

In case you are outside of the European community we could not send you flowers but we have sent you a vase of Delftware design, originally created in the late 17th century in the city of Delft. They were designed especially for tulips but you can put in any flower you wish. We hope this will enable everyone in your company to enjoy the beauty of flowers as well.

PCR Paris

PCR

One of the most important conferences on interventional medicine is coming up. We hope you can be there and meet with us. If you wish to make an appointment please send an e-mail to June at info@tulip-medical.com. It will be a good occasion to talk about the future.

PTA Balloon Catheter

We are proud to present to you our new PTA Balloon Catheter "Breeze".

We are currently in the middle of obtaining the CE-Certificate and we hope to be able to market it this summer. "Breeze" is a hydrophilic PTFE coated hypotube with a tapered soft tip. A rapid exchange, semi-compliant balloon for peripheral use. It has two swaged platinum marker bands and is specially designed for superior lubricity, optimal flexibility and good conformability. We will keep you informed on our progress.
